Subject: Limited Competitions: Prevent Cancer Foundation Grant Program

Date: April 1, 2022

The Prevent Cancer Foundation has announced its 2022 community grant guidelines. Their goal is to provide the resources needed to fund vital community-level activities in cancer prevention (including education or vaccination) or screening. The proposed projects must be aligned with their mission to support community projects or programs across the United States that focus on helping to prevent cancer or find it earlier and that demonstrate a potential to make a positive impact, especially in underserved communities.

Proposals are due to the sponsor by April 25, 2022. Grants are for \$25,000 for one year for organizations that will develop new or implement existing community projects/programs in cancer prevention and early detection. More information can be found [here](#).

This is a limited competition; organizations can only submit **one** application per year.

If you will be submitting a pre-proposal, you are required to submit a *statement of interest* including the title of your proposal, your name, department, and the names and department of additional personnel via UNM's [InfoReady Review portal](#) no later than April 7, 2022.

PIs who have submitted their SOI by the April 7th deadline are welcome to then submit a two-page preproposal by **NOON** on **April 11, 2022** via the [InfoReady Review portal](#). No late submissions will be considered. The preproposal should include a brief description of the activities and/or programs of your organization including the identification of necessary partnerships in the community, an overview of the community-level activities in cancer prevention (including education or vaccination) or screening, expected community impact, and a synopsis of the measurable objectives and evaluation methods.

The narrative should be accompanied by a **draft budget overview** and a 1-page **CV**.
